

## B2BGATEWAY OFFERS FULL EDI INTEGRATION FOR QUICKBOOKS ONLINE USERS

**March 21, 2014 | Boston, MA** – B2BGateway, the leading EDI QuickBooks Gold Developer with the highest client satisfaction rating on the Intuit Marketplace (<http://marketplace.intuit.com/AppID-2080-Overview.aspx>), is now offering fully-integrated EDI solutions to all QuickBooks Online users.

QuickBooks Online, a member of the QuickBooks family, is Intuit's fully cloud-based accounting software solution. This means that users can access the software anywhere as long as they have an internet connection. Three levels of QuickBooks Online are available; QuickBooks Online Simple Start, QuickBooks Online Essentials and QuickBooks Online Plus, each with additional features than the previous.

B2BGateway, which has been providing global EDI solutions since 1999 and has been a QuickBooks Gold Developer since 2003, can now offer full EDI integration to all QuickBooks Online users. Having full integration means that users will no longer have to re-key data, and will be able to exchange all business documentation such as purchase orders, invoices, shipping notices, etc., electronically with their trading partners.

The advantages of B2BGateway's full EDI integration solution for QuickBooks Online users are numerous; however, our clients would rate the following as their top three: it saves on labor costs, it reduces errors and it speeds up their 'order to payment' cash cycle.

*"We are delighted to have developed a fully-integrated EDI solution that customers can use with all QuickBooks Online products,"* stated Jessica Pagano, Sales & Marketing Analyst at B2BGateway. *"With 15 years' experience as fully-integrated EDI provider, it was only a natural progression that we would develop a truly integrated solution for one of Intuit's fastest growing products, QuickBooks Online."*

**About B2BGateway:** B2BGateway, a GS1 Accredited solution provider, is a leading global EDI (Electronic Data Interchange) provider with offices in North America and Europe.
