

WMSSoft and B2BGateway Announce Supply Chain Partnership for MYOB Advanced Users.

Brisbane and Sydney, Australia, January 12, 2016 – WMSSoft, an MYOB Enterprise partner and [B2BGateway](#), a world recognized EDI solution provider, today announced a partnership to provide cloud-based, fully-integrated Inventory Management and EDI solutions to users of MYOB Advanced.

MYOB Advanced is a new cloud-based ERP and business management software system designed by MYOB to meet the needs of growing business in the ANZ region.

WMSSoft's fully integrated warehouse management system, powered by The RIC Group, allows MYOB Advanced users to pick and pack goods, automatically create shipments, increase inventory accuracy and utilize multiple units of measure.

As a global organization with offices in Sydney, Australia, North America, Europe and China, B2BGateway supports all internationally recognized EDI standards and protocols that may be required by the MYOB Advanced user: EDIFACT, Tradacoms, Eancom, ANSI X12, XML, VAN, sFTP, AS2, etc.. By fully integrating with MYOB Advanced through cloud based technology, B2BGateway is able to remove the need for the user to re-key data. This, in turn, leads to greater accuracy, increased labour efficiencies and it expedites the order-to-payment cycle.

Many of WMSSoft's and B2BGateway's clients operate in the Wholesale Distribution, Manufacturing and Retail market verticals where having a good Inventory Management system coupled with EDI functionality is not only a necessity, but in today's modern, cloud-based, technological world is paramount for success and future expansion. Combining the power of WMSSoft's Inventory Management system together with B2BGateway's EDI solution gives the MYOB Advanced user a complete, fully integrated software suite that will greatly improve their overall supply chain processes and speed up their 'order to payment' cash cycles.

"EDI has also become very relevant to our many MYOB Advanced clients" says Paul Ellis, Director of Business Development at WMSSoft. "That is why it was imperative for WMSSoft to find a great MYOB Advanced EDI partner, one that we could recommend wholeheartedly to our clients. It was also very important that our staff could be safe in the knowledge that not only would our clients get a great cloud based EDI solution, but that they would also receive the same great level of service that WMSSoft clients have come to expect from us over the years. It is for these very reasons that we chose B2BGateway to be the EDI provider of choice for our MYOB Advanced clients."

B2BGateway has been providing cloud-based, fully-integrated EDI and automated supply chain solutions worldwide since 1999. "We are very pleased to partner with WMSSoft, one of Australia and New Zealand's leading MYOB Advanced partners" says Dante Dell'Agnese, ANZ Sales Director at B2BGateway. "WMSSoft is a perfect partner for B2BGateway, providing leading cloud based warehouse management solutions to our clients in the ANZ region."
